Re: Main extension - Stardust Ave. and Wilhelm Pl. NW, Meyers Lake Village

The owner of property has requested to extend an existing 6" main in Stardust Ave. N.W. to the south approximately 130 feet, and to install a new 6" main on Wilhelm Pl. south approximately 680 feet.

The elevation is about 1110, and the estimated pressure would be 55psi.

This extension is approximately 1,700 feet outside the City of Canton Corporation Limits, In the Village of Meyers Lake.

This extension would serve 15 new housing units.
